| CS Engagement | - | None |
| Core Tools Engagement | 93 | Excellent |
| Project Management | 73 | Great |
| Quality & Safety | 83 | Excellent |
| Project Financials | - | None |

Module Scoring Legend

- 0-25: **None** - minimal or no user engagement
- 25-50: **Moderate** - limited to a few project locations or usage is sporadic
- 50-60: **Good** - inconsistent usage across projects
- 60-80: **Great** - consistent strong usage across most projects
- 80+: **Excellent** - strong consistent usage across all projects

How scores are calculated

Procore module scores are based on user engagement, both frequency and recent usage. They provide insight into the day-to-day loss controls of an insured's projects. A low score indicates few users / projects while a high score indicates a high percentage of users and projects utilizing the module frequently and recently. We recognize that usage of Procore is not the only way to manage risk, and this report is only one of several inputs considered in an underwriting decision. A low score will never adversely impact a proposal from Shepherd.
